[Chieftec BD-02B-B Mini Tower Black 355 W:](#)

CHIEFTECs latest offer of Mini-Towers provide maximum functionality in scanty room thereby convincing by their yet-to-be-discovered features. At first sight, the three newcomers hardly differ from the standard mATX cases externally. At a second and closer look however, they are 21mm deeper and therefore more spacious. This, allowing for the installation of more powerful standard ATX power supply units as against in the past times, were only PS3 type power supply units with limited power could be built into these cases. Certainly, this is a strong point of argumentation for the todays price-sensitive users.
