AVM ISDN-Controller C2 ISDN access device

Brand : AVM

Product name : ISDN-Controller C2

Product code: 20001740

AVM ISDN-CONTROLLER C2 PC UK (PC)

AVM ISDN-Controller C2 ISDN access device:

The AVM ISDN-Controller C2 is the right hardware for server installations with up to two basic-rate ISDN lines. Equipped with a StrongARM SA-110 processor for 270 MIPS and 16 MB of on-board memory, the C2 supports all the ISDN communication services. Its design ensures unrestricted communication with digital or analog stations over all four channels simultaneously. The controller software for the C2 is available for Windows XP, 2003, 2000/NT, NetWare and Linux.
AVM ISDN-Controller C2. Data link protocols: ISDN. Modem speed: 128, 14.4. Minimum RAM: 16 MB, Minimum processor: CPU with 270 MIPS at 233 MHz

Technical details	
Compatible operating systems	Microsoft Windows 2000/NT 4.0/Linux/Novell NetWare 4.x
Interface type	PCI

Ports & interfaces	
Data link protocols	ISDN

Modem	
Modem speed	128, 14.4

System requirements	
Minimum RAM	16 MB
Minimum processor	CPU with 270 MIPS at 233 MHz
