Vertiv Avocent 48 Port ACS 5048 console server with dual AC power supply

[Vertiv Avocent Cyclades ACS5048 RJ-45:](#)

"The ACS 5000 Console Server Series meets the remote management needs of medium to large data centers. Security features such as SSH v2, RADIUS authentication, IP filtering and user access lists per port allow data center managers and system administrators to manage the network and servers remotely with greater control and reliability.

Console management features such as data buffering, direct access methods to the serial ports (TCP port and server name) and event notification improve monitoring capabilities, which allow for faster problem-solving and higher network uptime.
