### El Divisor de 15 Pines Permite Agregar un Disco SATA Adicional a una Computadora o Servidor

Este cable Y para alimentación de SATA de 15 pines permite que se agregue un disco duro SATA adicional a una computadora o servidor cuando no estén disponibles conectores adicionales del arnés de cables de la fuente de alimentación. Solamente desconecte un cable de alimentación de disco duro SATA del disco duro SATA existente y conecte el divisor de conectar y usar al extremo de 15 pines hembra del cable de alimentación. Vuelva a conectar los discos viejo y nuevo con las dos nuevas terminales hembra de 15 pines. Esto elimina la necesidad de actualizar la fuente de alimentación de la computadora para la compatibilidad con un disco SATA adicional.
