Módulo aislador de bus MUX

[Bosch FLM-7024-ISO convertidor, repetidor o aislador en serie Blanco:](#)

El módulo aislador de bus MUX FLM-7024-ISO se coloca entre los dispositivos en el bus MUX. Un cortocircuito en el bus provoca la activación de los aisladores adyacentes a cualquiera de los lados del cortocircuito. Esto genera la separación efectiva de todos los dispositivos situados entre los aisladores activados del resto del bus. Así, se evita la falla de todo el bus. Una vez que se resuelve el cortocircuito, los aisladores restablecen automáticamente la operación normal del circuito completo.
